The California Avenue Sewer Pipeline Project will provide additional flow capacity to carry sewage from new development and the planned decommissioning of the City's Water Reclamation Facility #3 (WRF3).

## California Avenue Sewer Pipeline Project

# 12/7/2018 - CONSTRUCTION UPDATE

Daytime construction along California Avenue north of Old Temescal Road to install the new gravity sewer line will begin on Monday, December 10 and continue through Friday, December 21. Work in this area will recommence after the winter holiday on Monday, January 7. The sewer construction work is being switched to daytime hours to improve safety for the public and the construction workers where conflicts with existing utilities and deep trenches make construction challenging.

**A short section of California Avenue north of Old Temescal Road will be closed during this time with a detour provided on Pico Street, Compton Avenue, and Old Temescal Road.** Access to all private driveways and the post office will remain open during construction. Delays may occur along California Avenue and nearby streets due to this construction.

**Please note:**

*Due to inclement weather or unforeseen issues, these dates and times are subject to change without notice. Please be advised, traffic delays are to be expected. Plan accordingly by taking alternate routes and/or allowing more travel time for known traffic delays.*
